

Envisionation Biosphere Restoration Restoration Plan

Creating a framework to drive the changes needed to restore our environment.

by Bru Pearce

Current Climate Situation

Exponential Worsening

The climate situation is bad and getting exponentially worse.

Feedback Loops

Multiple feedback loops interact, leading to a hyper exponential crisis and crisis and **immense financial costs**.

A global suicide pact

Net Zero by 2050 is woefully inadequate for addressing the crisis.

32 Years of Failure

1

Lack of Action

No real sign of necessary level of action.

2

Escalating Impacts

Climate feedback loops driving hyper exponential situation.

3

Collapse of natural carbon sinks

Increasing evidence of degraded biological climate management.

It's a biological system

1 Climate Management System

Life acts as its own climate management system. Our knowledge knowledge has grown significantly in recent years.

2 Anthropogenic Impact

Human civilisation has reduced the total amount of life on the the planet by 50% over 10,000 years.

3 Scientific Understanding

There is a shortage of biologists in climate research.

How did we get here?

1

Geopolitical Challenges

Competition for resources and land has created conflict.

2

Theological Differences

Faiths have usurped science and observation.

3

Fraudulent societal accounting structures

Our financial structures ignore the vast cost of environmental
environmental damage.

.

Build a framework for success

"Business As Usual" is killing us. We need to develop an economic model that model that makes **restoration profitable**.

By creating market incentives for restoring the biosphere, we can unleash the power of free enterprise and accelerate the transition to a healthier healthier planet.

The Biosphere Restoration Plan

UN SDGs provide an already agreed target

Deliver them and we will have a global population of 9 billion living well by 2050.

Restore Climate Stability

Re-establish the biosphere's natural climate-stabilizing capabilities.

Address Civilization Failings

Rectify environmental degradation by identifying structural weaknesses in systems.

The Restoration Solution

1

Regrow Lost Biomass

Restore the over 50% of life on Earth that has been lost and lost and draw down 550 billion tonnes of carbon from from atmosphere and oceans

2

Emergency solar radiation management

We have left it very late we need to prepare to act.

3

Climate Stabilisation

Return atmospheric CO2 close to pre-industrial levels

Necessary Actions

Legal Structures

Implement legal structures to protect the environment.

Financial Reforms

Build financial structures accounting for the true cost and real value of every action.

Observational Infrastructure

Establish infrastructure to measure and predict outcomes of our actions.

Monitoring the Biosphere with a digital twin

The data collected will enable biosphere accounting and measure the recovery of Earth's Earth's biomass.

Providing forward market projections.

Valuable information that will attract financial partners.

Empathy Economics

By integrating the value of ecological services into economic decision-making, Empathy Economics creates a future where human prosperity is intrinsically linked to the health of the planet.

The Empathy Coin platform is designed to be accessible to all, to all, enabling individuals to participate in the Biosphere Restoration Plan, regardless of their financial means.

Empathy Coins

Digital Asset

Launching accessible investment in the future.

Social Media

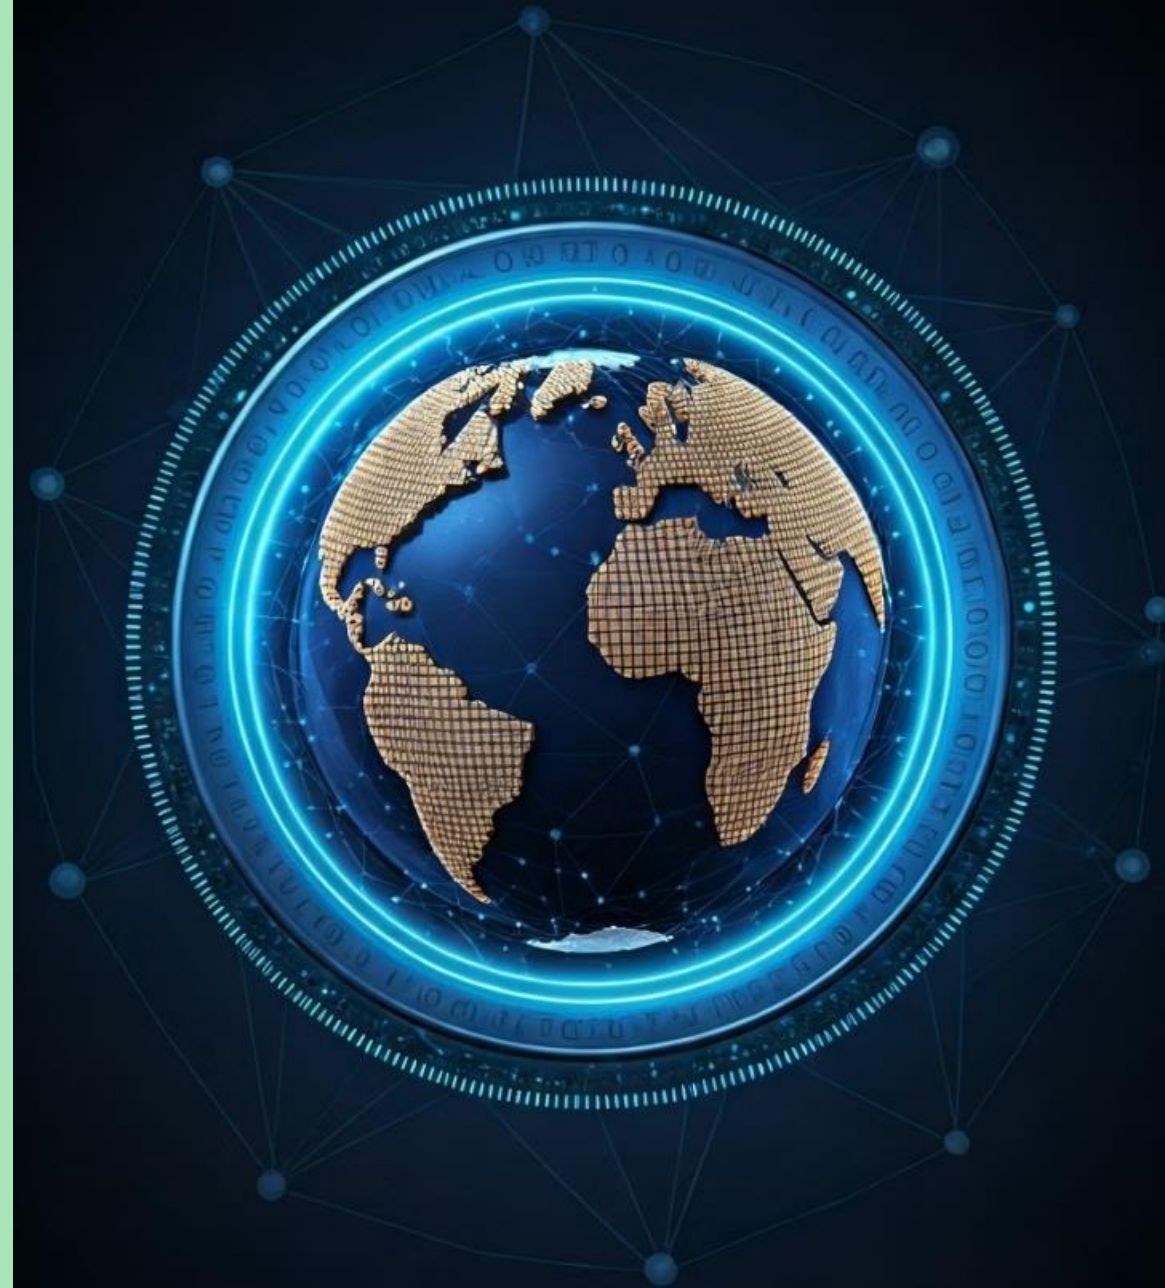

Promoted as meaningful investment opportunity.

Share in Plan

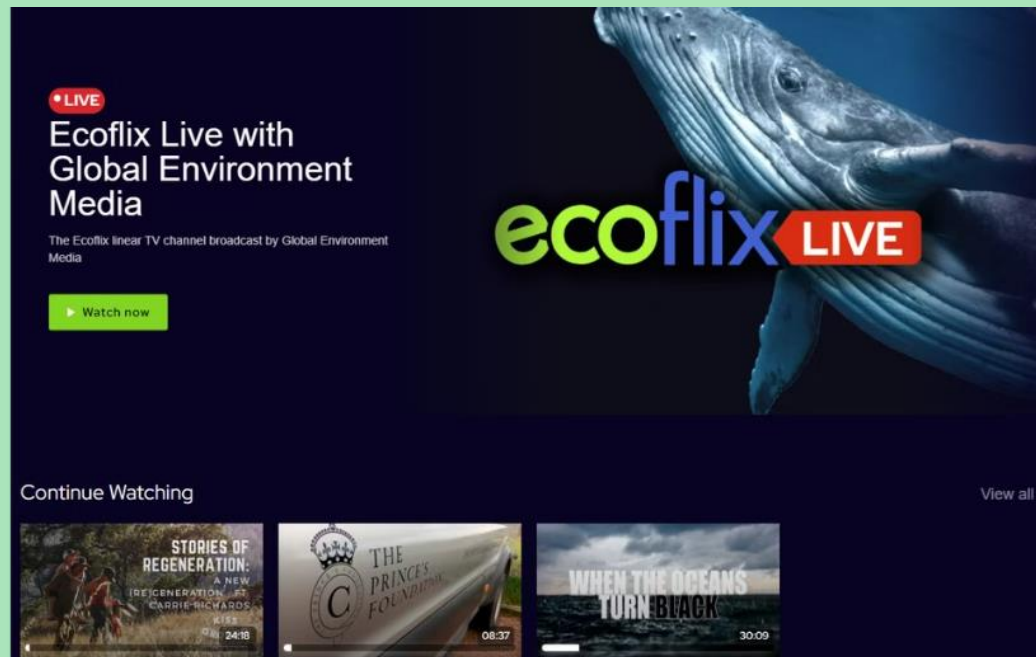

Secures stake in biosphere restoration.

Leveraged Funds

Partners: E4H and Total Impact Capital.

Partnership with Ecoflix

Ecoflix Delivering the Message

Ecoflix is a leading provider of environmental documentaries, documentaries, educational content, and entertainment, raising raising awareness of global issues.

Uworld.ai

Integrating blockchain technology for transparent, transparent, decentralised operations.

Get Involved

Donations – secure options

Currently accepting donations making it clear that it is high risk at the moment, while we build the infrastructure.

Empathy Coin Airdrop

For scientific input and financial donations.
